1 Why Do We Need This?

Current Situation

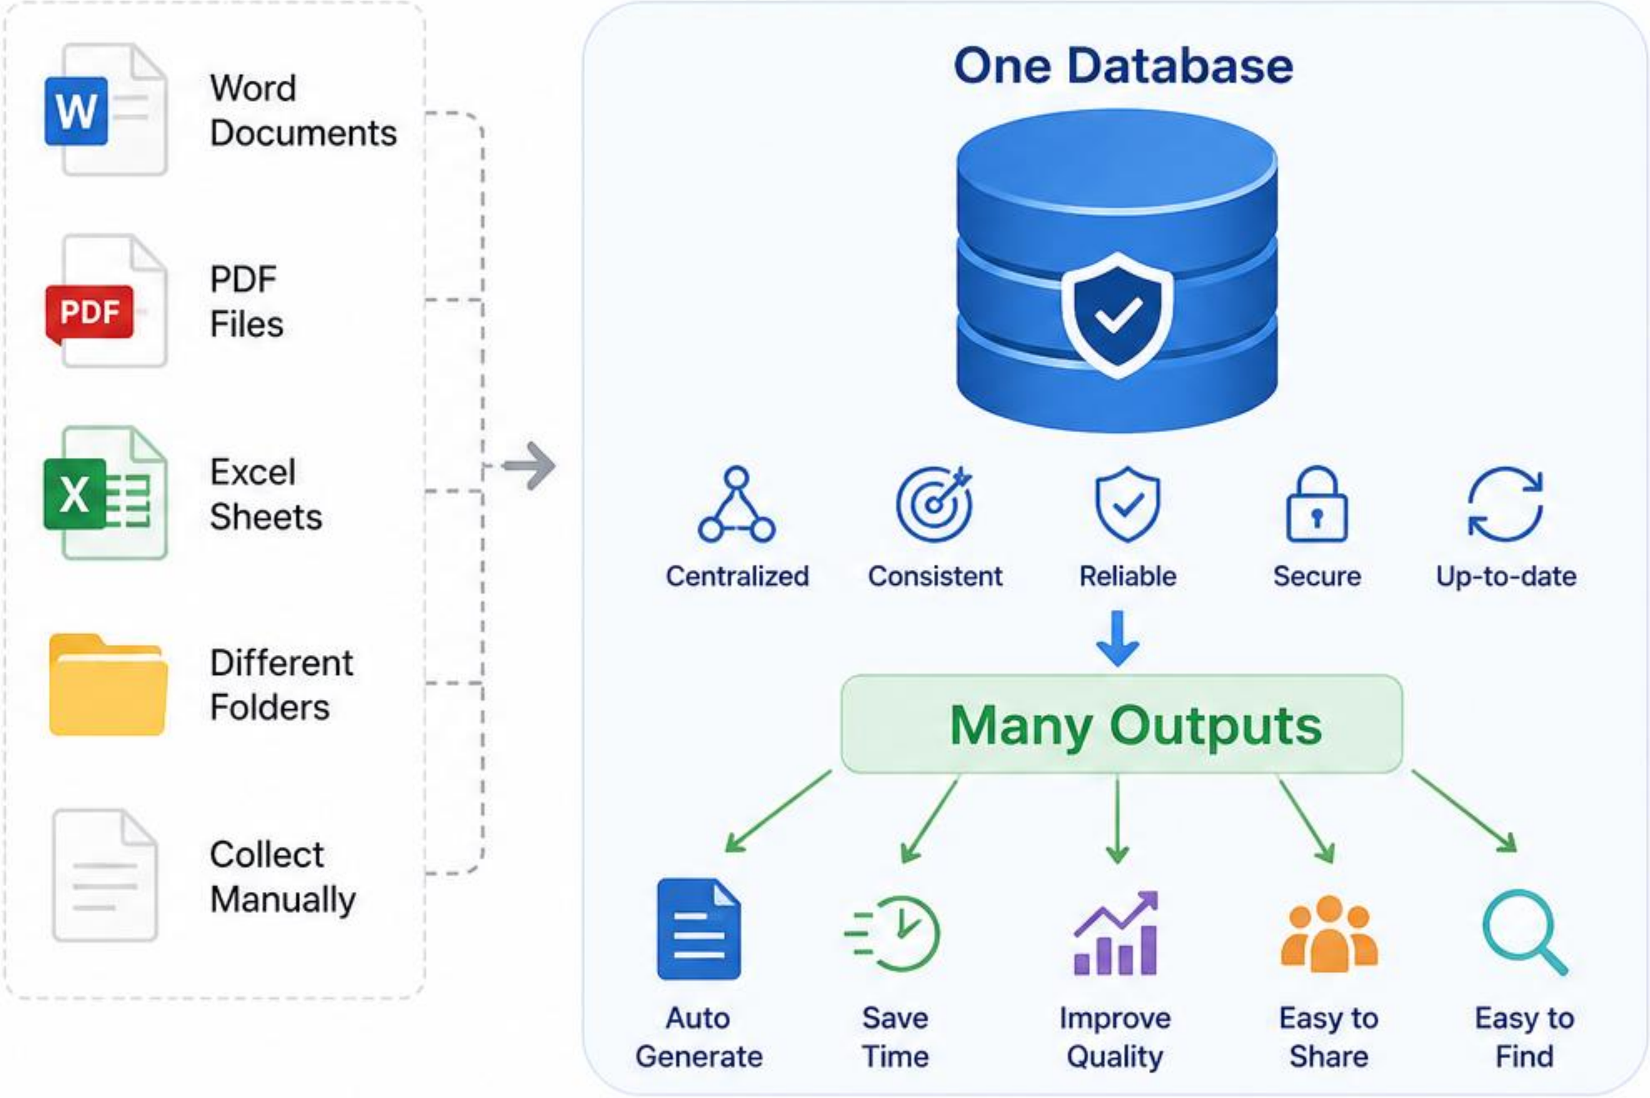
- Programme Information → Word Documents
- ↓
- Course Specification → Word/PDF
- ↓
- Assessment → Excel
- ↓
- Rubrics → Word
- ↓
- CQI → Another document
- ↓
- AUN Evidence → Collect manually

Problems

- Duplicate work
- Inconsistent information
- Difficult to update
- No central database
- Time-consuming accreditation

2 Our Vision

Instead of documents...



Examples

- Course Specification
- Lesson Plan
- Rubrics
- Assessment Plan
- Curriculum Mapping
- CQI
- AUN Reports

3 System Overview

A complete view of our Program Management System

Programme	Vision, Mission, PEOs, PLOs, Educational Philosophy
Curriculum	Program Structure, Study Plan, Course Map
Courses	Course Information, CLOs, Topics, Learning Activities, Course Specification
Lecturers	Assignments, Workload, Qualifications, Development
Students	Enrollment, Advising, Academic Progress
Assessment	Assessment Plan, Activities, Rubrics, Results
Quality Assurance	Monitoring, Evaluation, CQI, Accreditation
Reports	Dashboards, Analytics, Accreditation Reports

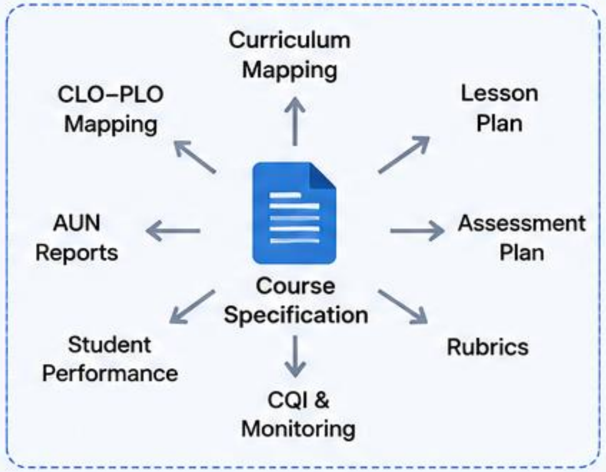
Continuous Improvement

Everything is Connected

Data flows through the system, ensuring alignment, transparency, and consistency across all levels.

Course Specification is Only One Part

It is generated from the course data and connected to the bigger system.



One system. One source of truth. Many outputs. Better quality. Less workload.

4 Main Modules

The core modules of our Program Management System

Each module is **interconnected**, sharing data to support a **seamless** academic management experience.

Programme Management

Manage program information, outcomes, and strategic direction.

- Vision, Mission, PEOs
- PLOs & Mapping
- Educational Philosophy
- Program Structure

Curriculum Management

Design and manage curriculum structure and study plans.

- Curriculum Structure
- Study Plan
- Course Mapping
- Prerequisites

Course Management

Create and manage courses and their specifications.

- Course Information
- CLOs & Topics
- Learning Activities
- Course Specification

Assessment Management

Plan, design, and manage assessments and rubrics.

- Assessment Plan
- Assessment Activities
- Rubrics
- Gradebook

Teaching Management

Support teaching activities and lecturer management.

- Lecturers
- Teaching Load
- Class Sections
- Learning Resources

Quality Assurance

Monitor quality, conduct evaluations, and drive improvement.

- Course Review
- Program Review
- CQI Activities
- Accreditation Support

Reports

Generate reports and dashboards for decision making.

- Dashboards
- Standard Reports
- Custom Reports
- Data Analytics

One system. One source of truth. Integrated modules for better collaboration, accuracy, and decision making.

Centralized Data | Integrated Workflow | Data Consistency | Save Time & Effort | Better Outcomes

5 Programme Management

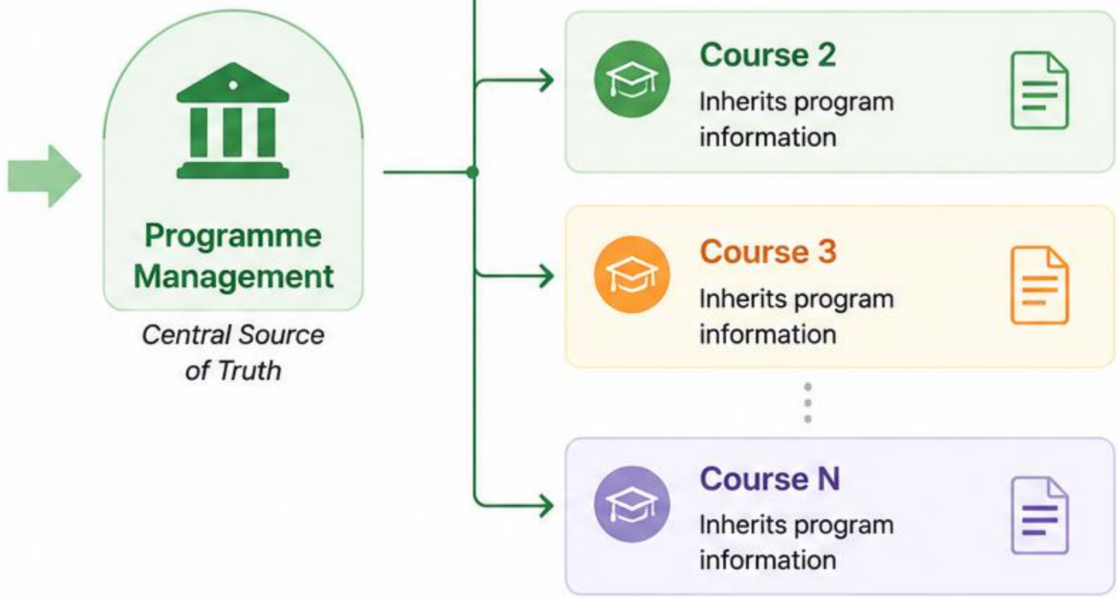
This is where AUN starts.

Programme Management stores the core program-level information that guides and aligns everything in our academic system.

What We Store

- **Vision** — The future we aspire to achieve.
- **Mission** — Our purpose and commitment.
- **Educational Philosophy** — Our beliefs about teaching, learning, and development.
- **PEO (Program Educational Objectives)** — What our graduates are expected to achieve.
- **PLO (Program Learning Outcomes)** — What students are expected to know and able to do.
- **Curriculum** — The program structure, study plan, and curriculum map.
- **Faculty** — Faculty members and their roles in the program.

Shared Across All Courses



Everything from Part 1 of the specification belongs here and is the foundation shared by all courses in the program.

- **Consistency** — One source ensures consistent information.
- **Efficiency** — Update once, applies everywhere.
- **Alignment** — All courses align with program goals.
- **Quality** — Stronger program, better outcomes.

6 Course Management

Each lecturer manages their course.

Empowering Lecturers
Manage every aspect of your course in one place.

Structured & Aligned
A clear workflow helps you design courses that are well-structured and aligned with program outcomes.

Connected & Integrated
All course data is connected to support mapping, assessment, and quality assurance.

1. Course Information
Basic details, description, credits, prerequisites, etc.

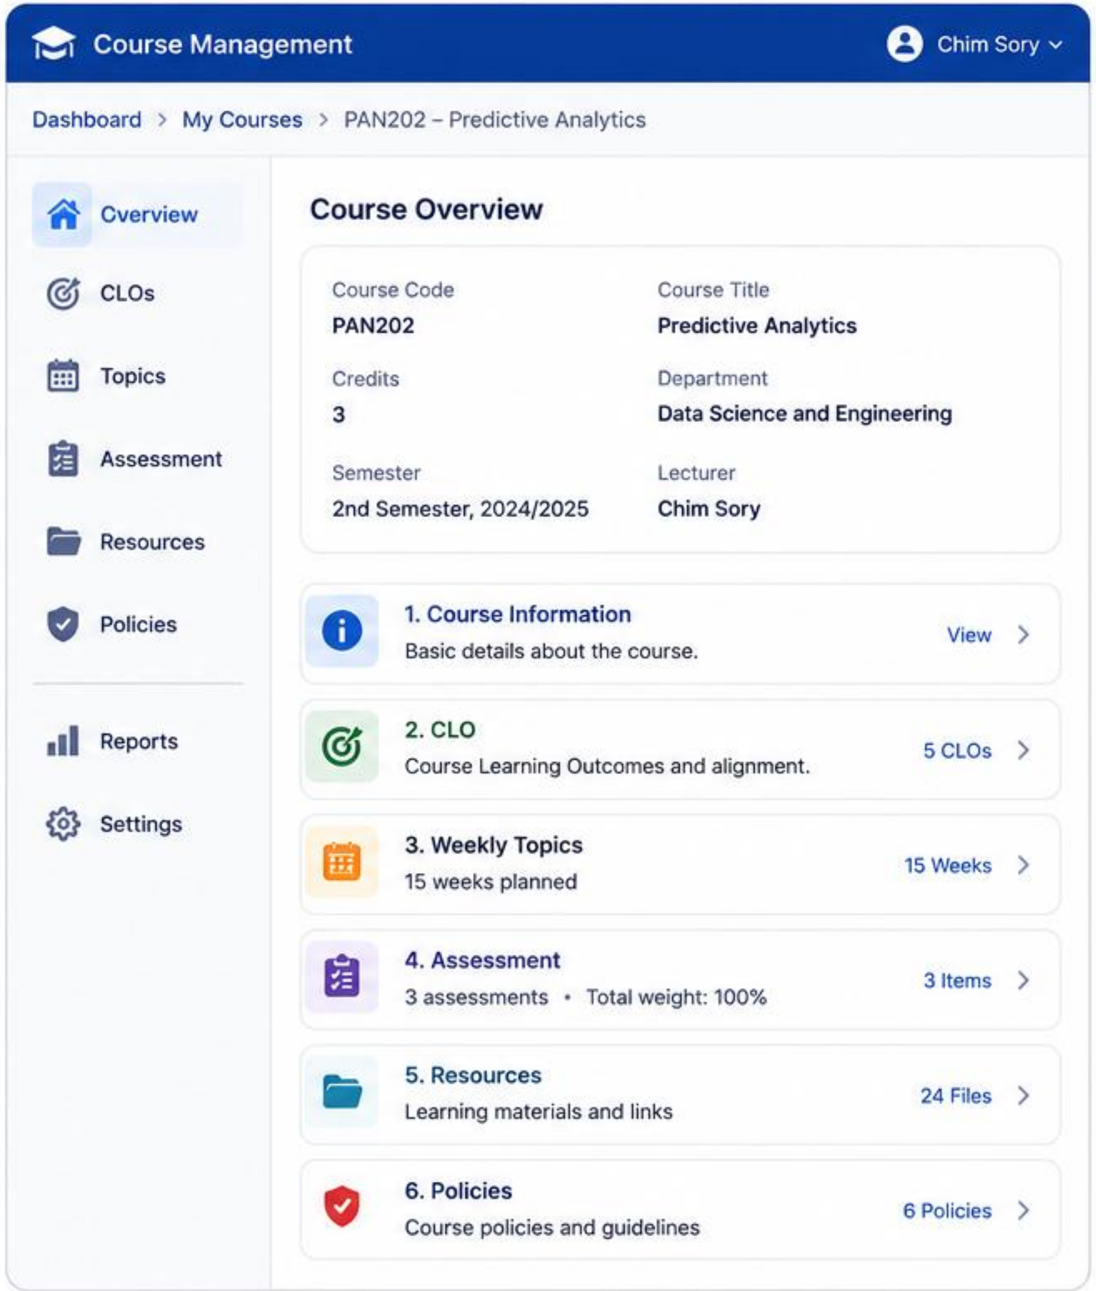
2. CLO
Define Course Learning Outcomes and alignment.

3. Weekly Topics
Plan syllabus, topics, and learning activities week by week.

4. Assessment
Plan assessments, tasks, rubrics, and weighting.

5. Resources
Upload and organize learning materials and references.

6. Policies
Set course policies, rules, and guidelines.



6 Course Management

Each lecturer manages their course.

Empowering Lecturers

Lecturers can create, organize, and manage all aspects of their courses in one place.

Focused & Structured

A clear workflow ensures that every course is well-designed, aligned, and easy to maintain.

Connected & Aligned

All course data connects with programme outcomes, assessments, and quality assurance.

Course Information
Basic details, description, credits, prerequisites, etc.

↓

CLO
Course Learning Outcomes and their alignment.

↓

Weekly Topics
Syllabus, topics, and learning activities week by week.

↓

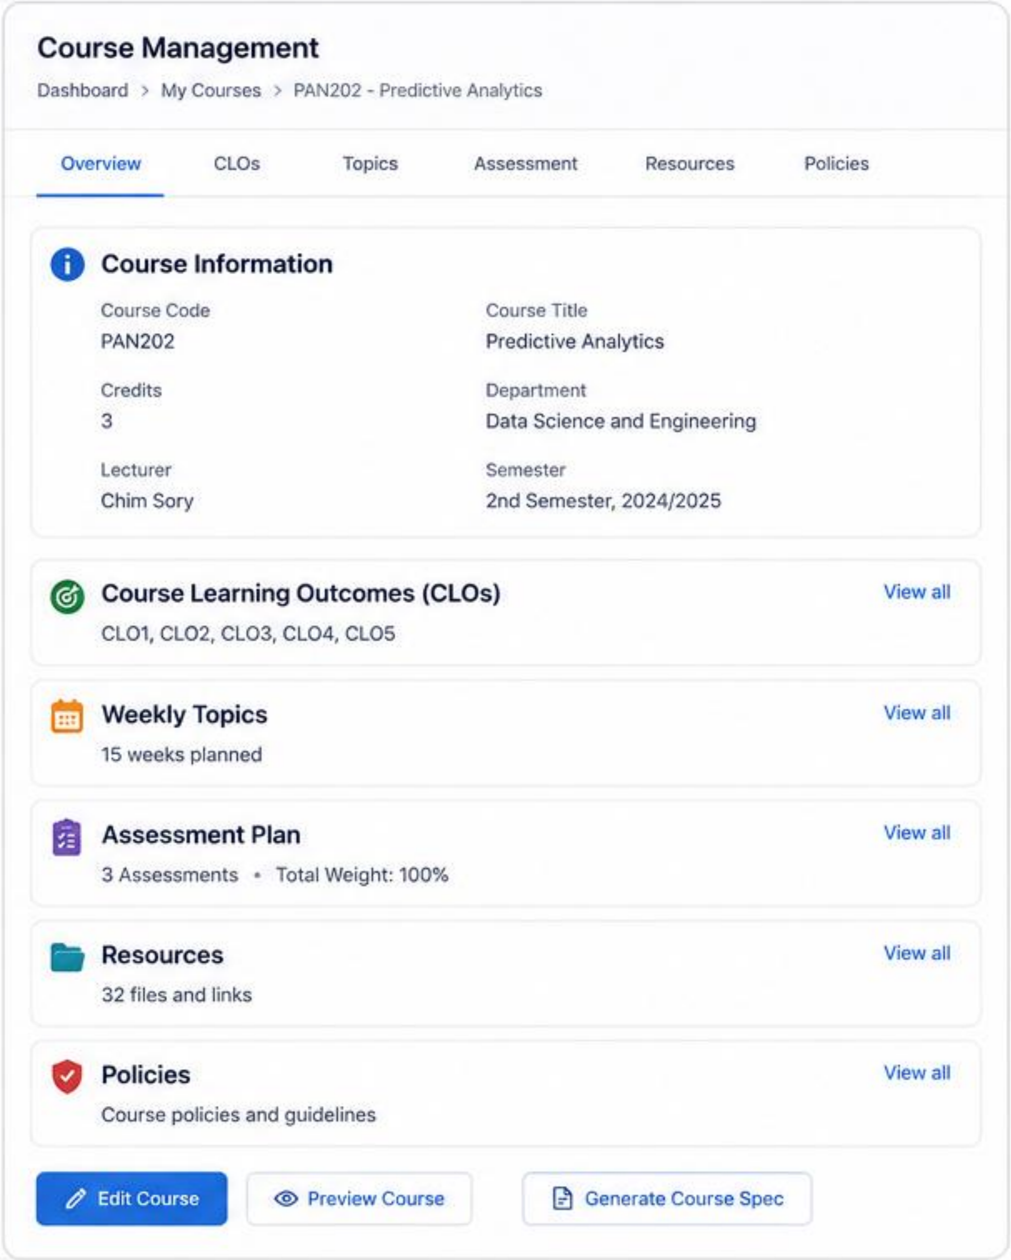
Assessment
Assessment plan, tasks, rubrics, and weighting.

↓

Resources
Learning materials, references, links, and attachments.

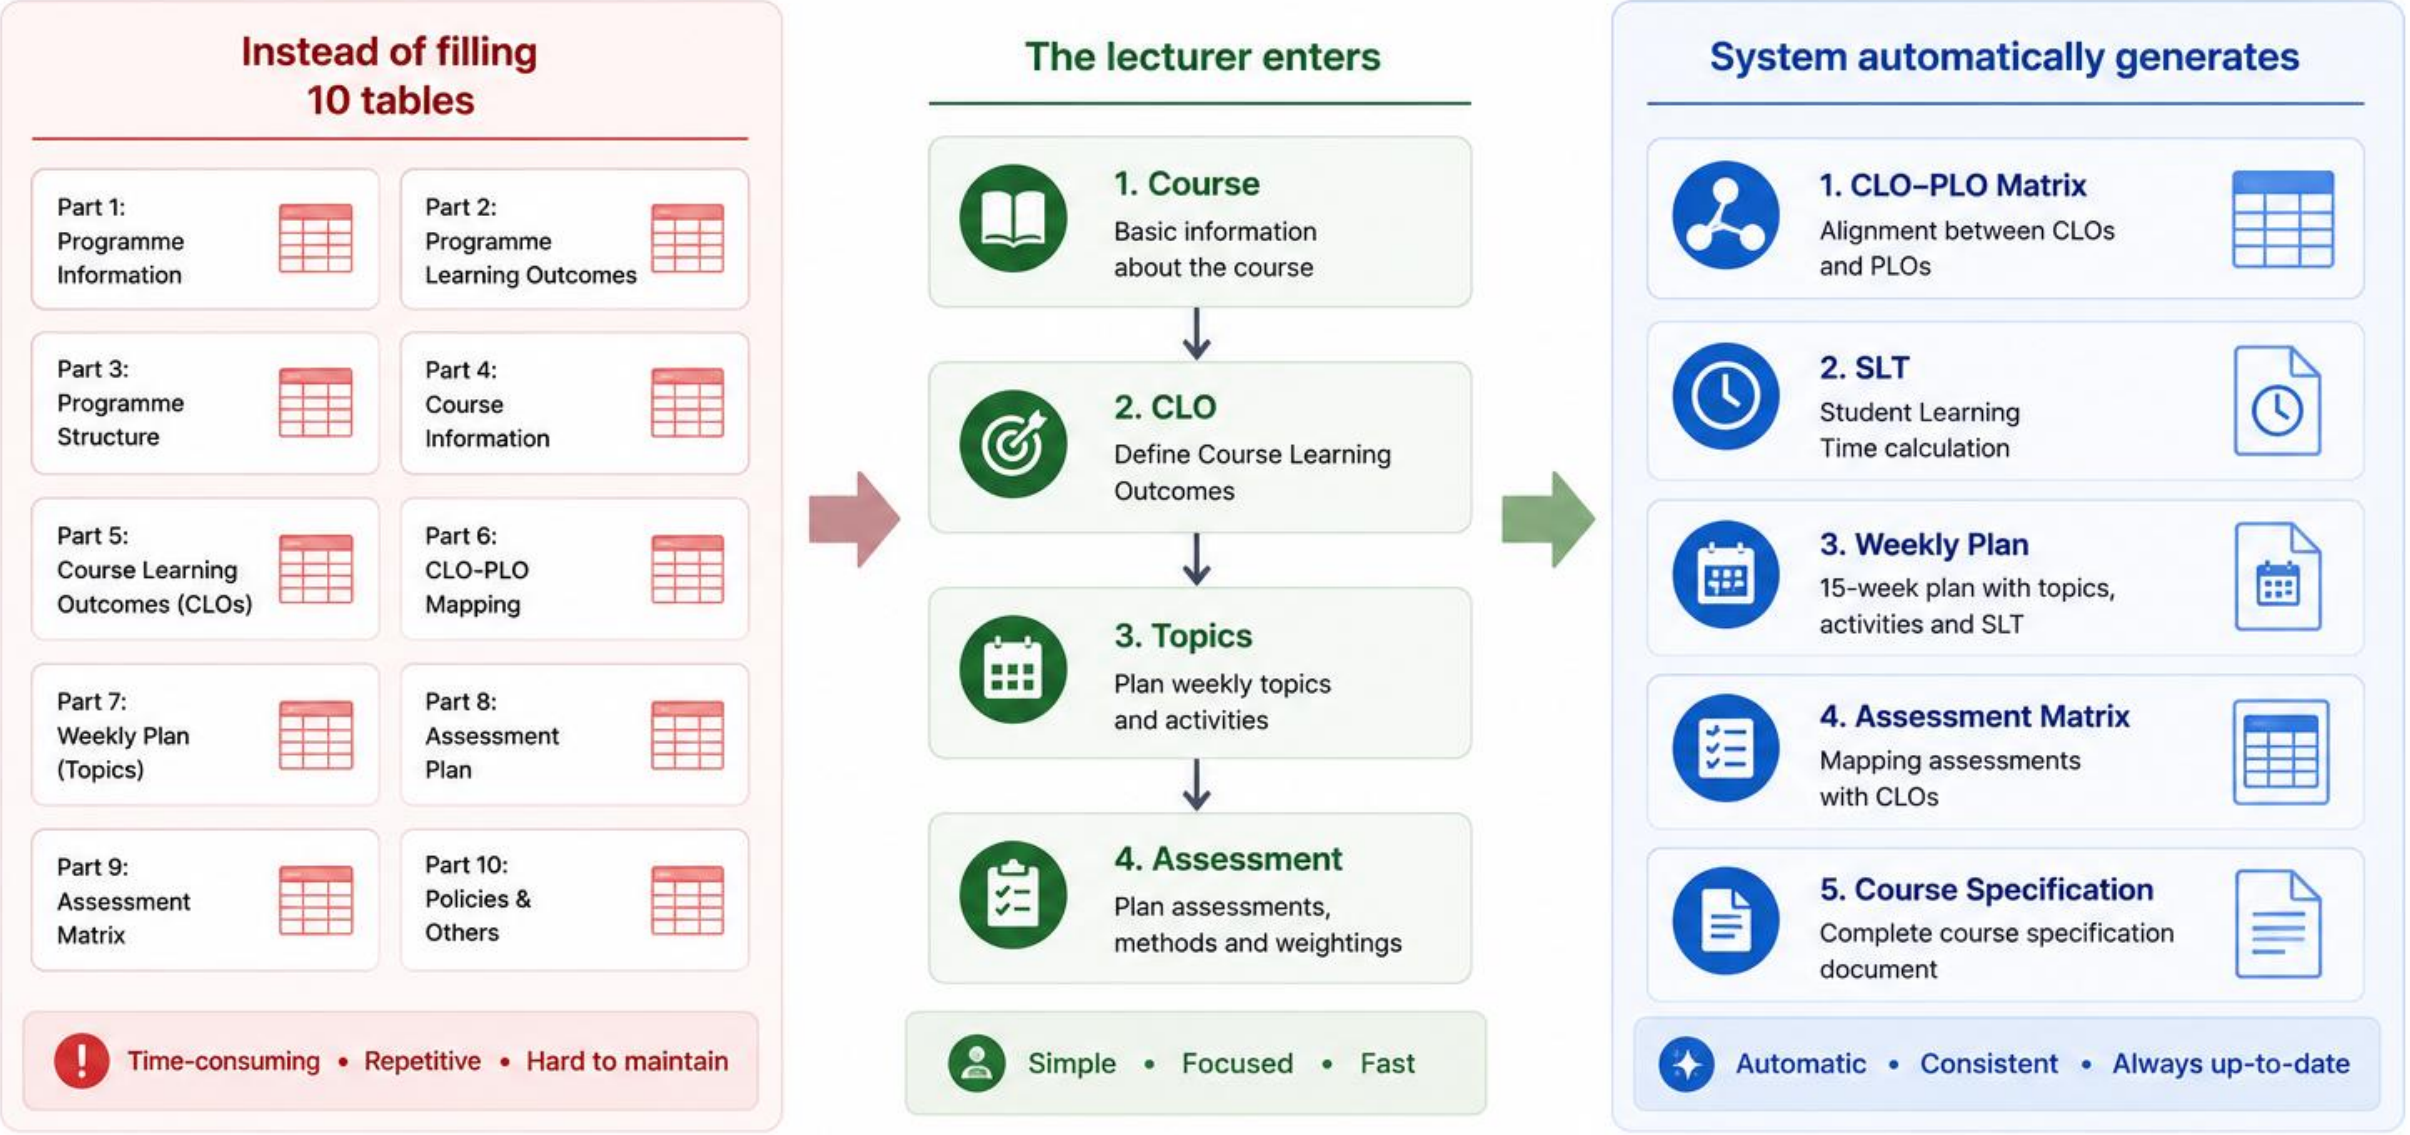
↓

Policies
Course policies, rules, and guidelines.



8 Automation

Enter once. Generate many. Save time. Ensure consistency.



9 Quality Assurance

Ensure quality. Monitor progress. Support improvement.

Department Head can see

A clear dashboard to monitor all courses in the program.

What You Can Monitor

- **Complete** — All required information is completed.
- **Missing CLO** — Course Learning Outcomes not added.
- **Missing Assessment** — Assessment plan or tasks are missing.
- **Missing Mapping** — CLO–PLO mapping is not completed.
- **Ready for Review** — All requirements met and ready for approval.

Much easier than checking PDFs.

Real-time overview helps you ensure every course meets the standards before submission.

11 Benefits

One system. Many benefits for everyone.

Lecturer

- Easy to create courses
- Less repetitive work
- Automatic document generation

Department

- Centralized information
- Consistent documents
- Easier monitoring

QA Office

- Ready for accreditation
- Better evidence
- Better reporting

Students

- Better aligned courses
- More consistent learning experience

Better Process. Better Outcomes.

Save Time
Reduce manual work and duplication.

Improve Quality
Consistent, accurate, and up-to-date.

Increase Transparency
Easy monitoring and clear visibility.

Enhance Learning
Better aligned courses lead to better learning.

12 Roadmap

Step by step towards a complete OBE system.

Phase 1

Build the Foundation

- Programme Management ✓
- Course Specification ✓

Year 1
Core modules ready

Phase 2

Enhance Teaching & Learning

- Assessment
- Rubrics
- Lesson Plans

Year 2
More teaching tools

Phase 3

Improve & Accredit

- CQI
- Analytics
- AUN Dashboard
- Programme Review

Year 3
Full OBE & AUN readiness

What are CLOs?

Course Learning Outcomes (CLOs) describe what students are expected to learn and be able to do by the end of this course.

Good CLOs are:

- Specific and clear
- Measurable and observable
- Aligned with PLOs
- Assessed through appropriate methods

Quick Tips

- Use action verbs from Bloom's Taxonomy.
- Focus on what students will be able to do.
- Ensure CLOs are aligned to PLOs.
- Limit the number of CLOs (3–7 is ideal).

ROYAL UNIVERSITY OF PHNOM PENH
Faculty of AI & Data Science

COURSE SPECIFICATION
PAN202: PREDICTIVE ANALYTICS

1. COURSE INFORMATION

Course Code	PAN202
Course Title	Predictive Analytics
Department	Artificial Intelligence and Data Science
Faculty	Faculty of AI & Data Science
Program	Bachelor of Science in Data Science
Year / Semester	Year 2 / Semester 2
Credits	3
Contact Hours	2 Lecture Hours / 2 Lab Hours per week
Prerequisites	DSC102 Introduction to Data Science
Course Type	Core

2. COURSE DESCRIPTION

This course introduces students to the fundamental concepts and practical techniques of predictive analytics. Students will learn how to collect, prepare, analyze, and model data to make predictions and support data-driven decision-making. The course covers regression, classification, model evaluation, and basic model tuning using Python and relevant tools.
